Aside from making the starbase more powerful due to better base stats and the addition of more weapon components, the upgrade also allows the owner to fit the starbase with different buildings and modules to increase its defensive capabilities and improve its contribution to the empire beyond its basic role of system control and defense. This is an empire-wide modifier, and thus affects all starbases owned by the empire. This has little effect on a human player aside from aesthetics, but AI empires use these rules to determine what to build on their starbases. 100 360 ¢ÃÃÃ2 Ã Ã+2Ã ÃNaval Capacity from Anchorages Anchorage module Ã ÃInterstellar Fleet Traditions technology Specialized drydocks erected on the Starbase's hull allow for the construction of gargantuan Titan-class ships. However, its buildings and modules can not be changed, neither improved or degraded, although they can be returned to the owner. An additional benefit of the improved star bases is manifested in its inclusion of an FTL inhibitor that, while the steel base remains active, prevents enemy ships from abandoning the system through any hyperline that is not by which they arrived. It can not be destroyed by any regular medium, but its owner can dismantle it at peace time if it has no more than the level of an advanced position (first will have to degrade the top-level star bases) and the system does not It is colonized. Keeping with control over each stellar base of the empire is enough to allow an empire to finish war through a status quo without losing any system, gaining a defensive victory. It is worth losing that the automatic updating of a stellar base can â € œIn-tech components to occupied stellar bases (including FTL inhibitors), while maintaining their own most advanced components. They will remain equipped even if this stellar base is recovered, so the repeated reconquest could be more difficult for both sides. This modifier also affects the maintenance of the modules and buildings of the stellar bases. Defense platforms are smaller military stations that are deployed around the stellar base and act as weapons platforms. The Academy of Fleet will ensure that these officers have updated knowledge about the doctrines and practices of interstellar war. This is done automatically and does not have any additional cost for the Empire, so it also does not affect the level update cost of a stellar base. 100 360 Ã ¢ 2 +5 Research System has an enclave curator a diplomatic agreement with curators this art college of zero g, which in conjunction with the nearby Artisan Enclave, celebrates the beauty of outdoor space in works produced by its talented students.
